

Hardy Giesler is an Economics graduate from the University of Stellenbosch in South Africa. He started his career in Oil & Gas before moving to the UK, where he joined Celerant Consulting and helped to build the enterprise into a global business, expanding from 40 to 700 employees. Focused on asset-intensive industries, he worked with the Oil & Gas, Transport, Resource and Infrastructure sectors across Europe and North Africa, before joining London Underground as their youngest ever director in charge of three of the eight engineering businesses. He was also a member of the Engineering Board throughout a major sourcing review, called Make or Buy.

Since then he was part of a small team leading the turnaround and subsequent trade sale of Energis Communications to Cable & Wireless, before joining Anglo American as a Managing Director.

He was also VP of Energy Consulting for IHS, with a global client base and offices in Beijing, Geneva, London and Houston. With extensive experience in Resources, Energy and Transportation, Hardy joined Hybrid Air Vehicles in August 2011 to lead the Business Development team.
